The Smartest Choice for Security Ratings
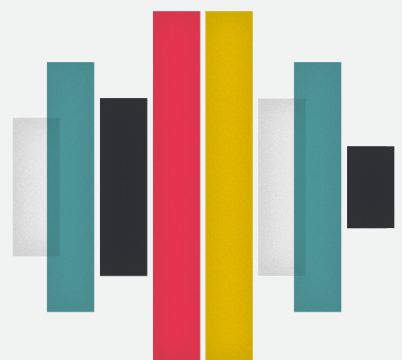

Transparent Data Collection & Accurate Scores

✓ Instant visibility of any company's security risk posture based on trusted data collected from a global network of proprietary, commercial, and open-source intelligence signals

✓ Transparent scoring methodology that accurately calculates A-F security ratings based on identified security issues relative to company size and digital footprint

Advanced Analytics

✓ Data science expertise that enables risk analysis and assessment across multiple issue types within 10 key risk factor categories

✓ Unique Breach Insights that predict likelihood of attack across vendor portfolios

✓ Board-level reports for business-centric view of ecosystem risk

Platform Scalability

✓ >800 customers that rely on our continuous monitoring of over 1 million companies and counting

✓ Ability to seamlessly operationalize solution via integration with existing GRC/VRM platforms

✓ Actionable remediation guidance that can be shared with third-party communities

Collaborative Remediation & Vendor Engagement

✓ Interactive platform designed for fast collaborative issue resolution

✓ Free platform access for invited vendors to control their scorecards

✓ Visibility into the precise impact of specific security issues on risk ratings over time

✓ Automated "best path" and customized action plans to achieve target security rating

Flexible Licensing & Best-in-Class Customer Relationship Management

✓ Concurrent vendor licensing; easy self-service slot swapping

✓ All-inclusive license with no hidden costs

✓ Dedicated customer support for remediation guidance and solution value optimization

✓ Highest/most frequently reviewed IT VRM solution provider in Gartner Peer Insights
