MITE3
CYBERSECURITY

Hans Minten
hans@mite3.nl

Crunching and analysing reports and data to investigate #breaches,#vulnerabilities #hacks, and #threats and building realistic #counter-measures is what I do best.

That is me in a nutshell, although my interests, passion, experience and knowledge extend far beyond that. With having more than 25 years of experience in IT and Cybersecurity I bring a wealth of expertise to the proverbial table. So are you looking for an seasoned Cybersecurity expert and pen-tester with an appetite for continues growth and delivering honest and real value to help you further?

Then look no further. Hire me and I will help you become more resilient against cyber threats.

Previous relevant positions

Senior Security Operations Center Analyst a.i.   02/2022 - 01/2024
Responsible for the day-to-day operation and coaching of the Security Operations Center and for implementing new or changed detection measures so that security risks and threats are properly monitored.
Security Analyst   06/2017 - 01/2022
While deep diving into security incidents, and hunting for threats, vulnerabilities and breaches, I always remained calm and thorough as an analyst and pen-tester, while making sure to unturn every stone.

IT & Network Security Engineer   05/2012 - 06/2017
My responsibility was to set up and maintain a secure workplace, server, storage and network environment, to make sure that malware, threats and breaches were promptly detected and swiftly removed before doing any harm to business operations and sensitive data.

MITE3 CYBERSECURITY

Hans Minten
hans@mite3.nl

Throughout my work as a threat hunter, penetration tester and security analyst I have come across a variety of frameworks and tools. The frameworks and tools that I am the most familiar with and are the most known are mentioned below. It goes without saying that I do know more, and continuously learn new tools and techniques.

When it comes down to getting the job done, I know the right tool for the right vulnerability.

Frameworks

Open Web Application Security Project (OWASP)
The Open Web Application Security Project is an online community that produces freely-available articles, methodologies, documentation, tools, and technologies in the field of web application security.

Center for Internet Security (CIS)
CIS Benchmarks are best practices for the secure configuration of a target system. Available for more than 100 CIS Benchmarks across 25+ vendor product families, CIS Benchmarks are developed through a unique consensus-based process comprised of cybersecurity professionals and subject matter experts around the world.

MITRE ATT&CK
MITRE ATT&CK® is a globally-accessible knowledge base of adversary tactics and techniques based on real-world observations. The ATT&CK knowledge base is used as a foundation for the development of specific threat models and methodologies.

Certifications and Training courses

- **Certified in Cybersecurity, 2024**
  Security Principles, Business Continuity (BC), Disaster Recovery (DR) & Incident Response Concepts, Access Controls Concepts, Network Security, Security Operations

- **Information Operations - Influence, Exploit, And Counter at Blackhat USA, 2023**
  IO strategies, military IO doctrine and TTPs, psychological operations, deception and counterdeception, IO incident response, how to craft themes and messages, propagation techniques, and tactics for defending and countering information operations.

- **HBO Security Management, 2021**
  Information Security, ISO 27001, and Risk Management

- **EC-Council Master License Penetration Tester (Master LPT), 2013**
  Highest level of certification in regard to penetration testing and the use of exploits, SQL injection, Cross-site scripting (XSS), LFI, RFI vulnerabilities and various other techniques.
  EC-Council Licensed Penetration Tester (LPT), 2013
  EC-Council Certified Security Analyst (ECSA), 2013
  EC-Council Certified Ethical Hacker (CEH), 2013

- **Sophos Certified Engineer, 2020**
  Certified engineer to one of the world's leading anti-malware solution Sophos InterceptX.

- **Mimecast Technical Professional, 2019**
  Certified engineer to one of the world's leading email security solution Mimecast.

- **Certified Red Team Operator (CRTO), 2018**
  Certification in regard to offensive security to breach physical buildings by using social engineering and (physical) hacking.

- **Registered Open Source Intelligence Analyst, 2018**
  Certification in regard to the use of OSINT and SOCMINT to gather intelligence from people by means of social engineering and open source information sources.

- **Advanced Practical Social Engineering at Blackhat USA, 2017**
  Certification for practical social engineering techniques like pre-text setups, subtle interrogation, and body language.

- **Paul Ekman Group, Micro/subtle Expressions, 2017**
  Certification for techniques like micro and subtle facial expressions and body language used in social engineering.

- **ELearnSecurity Junior Pentester (eJPT), 2017**
  Certification for penetration testing and techniques.

- **ELearnSecurity Network Defense Professional (eNDP), 2016**
  Certification for blue team network defense techniques.
